

DAVID OKPE

SOFTWARE ENGINEER

PROFESSIONAL SUMMARY

Architecting scalable web applications, ecommerce platforms, and multi-tenant systems. Foundation in mechanical engineering principles, applied to software: building robust databases, high-performance interfaces, and executing end-to-end product design. Proven track record of shipping production-level features and leading technical execution for standalone brands and enterprise clients.

SKILLS

- Core Architecture: JavaScript, TypeScript, Node.js, Express
- Frontend Systems: React.js, Next.js, Vue.js, Tailwind CSS, Redux, SCSS
- Backend & Databases: Supabase, Firebase, MongoDB, PostgreSQL
- UI/UX & Product Design: Figma, Canva, Affinity Publisher, Wireframing
- Infrastructure & Tooling: Git, GitHub, Vercel, Netlify, Vite, WordPress

WORK EXPERIENCE

JelloSite | Software Developer

2025 – Present

- Optimized complex, multi-tenant architecture for the core platform utilizing React, Node.js, and Supabase.
- Shipped production-level features and executed high-impact technical solutions in direct collaboration with leadership.
- Maintained rigorous system design standards to support a scalable, high-performance production environment.

Darllix | Lead Developer & Architect

2025 – Present

- Architected and deployed a multi-tenant ecommerce SaaS engine using Next.js and Supabase, empowering Nigerian entrepreneurs to launch independent storefronts.
- Engineered an endless-scroll marketplace feed driven by a custom ranking and search algorithm to optimize product discovery and maximize buyer engagement.
- Built a native "Promote" ecosystem, allowing vendors to boost product visibility through algorithmic prioritization, establishing a core platform monetization pipeline.
- Developed comprehensive vendor dashboards for real-time order tracking, secure payment integrations, and customer lifecycle management.

Ruumies | Full-Stack Developer

2025 – Present

- Developed a roommate-matching and apartment-sharing platform.
- Implemented escrow-based payment system for secure transactions.
- Built authentication, real-time chat, and responsive UI with React, Tailwind CSS, and Firebase

Thefourdevs | Frontend Developer (Contract)

2023 – 2024

- Developed a roommate-matching and apartment-sharing platform.
- Implemented escrow-based payment system for secure transactions.
- Built authentication, real-time chat, and responsive UI with React, Tailwind CSS, and Firebase
